**Subject:** Notice in Accordance with TSCA Section 8(e): Results of an acute oral screening study with two experimental pesticides

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of an acute oral screening study (non-GLP) with experimental pesticide 1 [REDACTED] and experimental pesticide 2 [REDACTED] in Wistar rats [CrI:WI(HAN)] conducted by [REDACTED].

The study was performed to assess the acute toxicity following oral administration in Wistar rats.

Single doses of 50 mg/kg body weight of test-item preparations in 1% CMC-solution in drinking water were given to fasted female Wistar rats each by gavage.

The following table shows lethality at the offered dose level:

| Test item                   | Dose level<br>(mg/kg body weight) | Animals tested | Lethality |
|-----------------------------|-----------------------------------|----------------|-----------|
| experimental<br>pesticide 1 | 50                                | 3              | 3         |
| experimental<br>pesticide 2 | 50                                | 3              | 2         |

Under the condition of the above-mentioned study the median lethal dose of the test items after single oral administration is less than 50 mg/kg body weight in Wistar rats.
